U. S. BEEF BREEDING CATTLE

INSPECTED FOR EXPORT

U. S. beef and dairy breeding cattle exports are increasing in numbers and value due to U. S. market development programs and other trade-stimulating efforts. Breeding cattle inspected for export from the United States in the first half of 1957 totaled 32,184 head, compared with 12,842 head for the corresponding 6-month period in 1956.

As a convenient reference guide to facilitate future market transactions, the Foreign Agricultural Service has prepared this statistical summary on exports of beef breeding cattle for the period January-June 1957.

This is the first of a series of such reports that will be published at 6-month intervals, along with companion reports on exports of dairy breeding cattle.

Of the 25,059 head of U. S. beef breeding cattle inspected for export during January-June 1957, 44 percent were Hereford. Brahman represented 21 percent of the total, while Santa Gertrudis accounted for 11 percent and Aberdeen Angus 5 percent. Unspecified and other breeds made up the remaining 19 percent. Of the beef cattle inspected for export, 15,070 head, or 60 percent, were females. Sixty-nine percent of these were at least 2 years old.

Among the 25 countries to receive U. S. beef breeding cattle as shown by inspections for the first 6 months of 1957, Mexico took 18,261 head--73 percent of the total inspected. Canada, Venezuela, and Cuba together accounted for 25 percent. The 18,261 head of beef breeding cattle destined for Mexico were classified as having origins in 14 States, although 91 percent of these exports to Mexico originated in Texas, New Mexico, and Arizona. Fifty-seven percent of the beef breeding cattle going to Mexico were Hereford.
